A Request for Continued Examination (RCE) under 37 CFR § 1.114, including the fee set forth in 37 CFR § 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR § 1.114, and the fee set forth in 37 CFR § 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR § 1.114. Applicant's submission submitted via Certificate-Of-Mailing on August 30, 2006, has been entered.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: Claims 1-31 and 36-38 were determined to be allowable over the prior art during the previous prosecution. Further search by the Examiner has uncovered no additional prior art that would negate such determination. Applicant's amendment accompanying the present RCE has canceled claim 39, the only claim that was rejected in the previous Office action. The amendment has also corrected all informalities previously noted by the Examiner. Claims 1-31 and 36-38, the only claims pending in the application, are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

DISCUSSION OF THE CITED PRIOR ART

The JOURNAL OF BIOMEDICAL OPTICS article by Park et al, submitted by applicant in the Information Disclosure Statement accompanying the filing of the present RCE, shows a fiber-based, polarization-sensitive optical coherence tomography method and apparatus, but the apparatus does not include all the elements of applicant's claims. For example, there is no variable wave retarding element or quarter-wave retarder disclosed or suggested by Park et al for the sample path. This document has been made of record in the application (note the attached initialed copy of form PTO-1449).
